

1 In a snapshot

Since 2002, I am professor of Statistics at the Université Libre de Bruxelles (full professor since 2010). I have been visiting professor at the Université Pierre-et-Marie Curie (Paris 6, from 2009 to 2014), in KULeuven (2015), and in Toulouse School of Economics (2015 and 2016). My main research fields are asymptotic statistics, nonparametric inference, high-dimensional statistics. I am the author of 70 published papers (among which 11 contributions in the *Annals of Statistics*, 7 in *Bernoulli*, and 3 in the *Journal of the American Statistical Association*). I am currently Associate Editor for 5 international journals, including the *Annals of Statistics* and the *Journal of the American Statistical Association*. From 2014 to 2016, I acted as (co-)Editor-in-Chief of *Statistics and Probability Letters*. I have acted as supervisor of 2 Ph.D. theses (both completed) and as co-supervisor for 8 Ph.D. theses (5 completed, 3 in progress). I obtained several awards, the most prestigious of which being the *Gottfried E. Noether Young Scholar Award* (from the American Statistical Association).

2 Personal information

Name: PAINDAVEINE Davy, Ludovic

Born: September 23, 1976 in Haine-Saint-Paul (Belgium)

Citizenship: Belgian

Address: ULB, ECARES, Avenue F.D. Roosevelt 50, CP114/04, B-1050 Brussels

Office: R42.6.207 (Solbosch campus)

Phone (professional): +32 2 650.38.45

Phone (private): +32 2 374.01.27

Phone (cell): +32 497 44.12.24

E-mail: dpaindav@ulb.ac.be

Homepage: <http://homepages.ulb.ac.be/~dpaindav>

Languages: French, English

3 Education

1994-1998: Licence en sciences mathématiques (Université Libre de Bruxelles).

- Première candidature (1994-1995): *la plus grande distinction* (highest grade).
- Seconde candidature (1995-1996): *la plus grande distinction* (highest grade).
- Première licence (1996-1997): *la plus grande distinction* (highest grade).
- Seconde licence (1997-1998): *la plus grande distinction* (highest grade).

1997-1998: Agrégation de l'enseignement secondaire supérieur (Université Libre de Bruxelles): *grande distinction*.

1998-2000: DEA en Statistique et Recherche Opérationnelle, spécialisation statistique (Université Libre de Bruxelles): *la plus grande distinction* (highest grade), with *félicitations du Jury*.

2000-2002: Doctorat en Sciences, orientation statistique (Université Libre de Bruxelles), with *félicitations du Jury* (highest grade).

Title of the dissertation: “Optimal invariant signed rank tests for elliptically symmetric location and time series problems”, defended September 3, 2002 (advisor: M. Hallin).

4 Full-time positions

1998-2002: Assistant at the Mathematics Department, Université Libre de Bruxelles.

2002-2006: Chargé de Cours (tenured junior professor) of Statistics at the Institute of Statistics and Operations Research (ISRO), Université Libre de Bruxelles (since October 1, 2002).

2007-2010: Professeur (associate professor) of Statistics at the Faculté des Sciences sociales et politiques, Solvay Brussels School of Economics and Management, Université Libre de Bruxelles.

2010 to present: Professeur ordinaire (full professor) of Statistics at the Solvay Brussels School of Economics and Management, Université Libre de Bruxelles.

5 Visiting positions

1999-2000: Visiting professor, Institut National de Statistique et d'Economie Appliquée, Rabat, “Introduction aux processus stochastiques”.

2005-2007: Visiting professor, ISUP, Université Pierre-et-Marie-Curie (Paris 6), “Statistique non paramétrique”.

2009-2014: Visiting professor, LSTA, Université Pierre-et-Marie-Curie (Paris 6), “Statistique fondamentale”.

2014-2015: Visiting professor, Department of Mathematics, KULeuven, “Multivariate ranks and statistical depth”.

2014-2016: Visiting professor, Toulouse School of Economics, Université Toulouse 1 Capitole, “Statistical depth”.

6 Academic service

- Associate editor for the *Annals of Statistics* (2013-).
- Associate editor for the *Journal of the American Statistical Association* (2017-).
- Associate editor for the *Journal of Statistical Planning and Inference* (2012-).
- Associate editor for the *ESAIM: Probability and Statistics* (2013-).
- Associate editor for the *Econometrics and Statistics* (2016-).

- Co-Editor-in-Chief for *Statistics and Probability Letters* (2014-2016).

- Associate editor for *Statistica Sinica* (2011-2014).
- Associate editor for *Statistics and Probability Letters* (2010-2013).
- Associate editor for *International Statistical Review* (2011-2015).
- Associate editor for *METRON International Journal of Statistics* (2007-2012).

- IMS Committee on New Researchers (2011-2013).

- Co-director of the European Centre for Advanced Research in Economics and Statistics (ECARES) (2006-2012).
- Member of the ECORE (ECARES + CORE) executive committee (2006-2012).
- President of the Jury for the Master in Statistics, ULB (2009-2014).
- Co-organizer of the Statistics Seminar at ECARES and Département de Mathématique, ULB (2008-present).
- President of the FNRS graduate school in Statistics and Actuarial Sciences (2009-2011).
- Co-organizer of the Econometrics and Statistics Seminar at ECARES, ULB (2002-2007).
- Secretary of the Jury for the Master in Statistics, ULB (2005-2009).
- Elected member of the Conseil de la Société Française de Statistique (2006-2009).
- Representative of the Société Française de Statistique in the Conseil de la Société Mathématique de France (2006-2009).
- Vice-President of the FNRS graduate school in Statistics and Actuarial Sciences (2005-2009).

7 Research grants

2003-2006: crédit aux chercheurs F.N.R.S. (“*Développement d’un estimateur optimal de la matrice de forme d’une distribution elliptique, basé sur les rangs signés généralisés. Développement de méthodes de rangs basées sur des contours multivariés généralisés*”).

2007-2009: mandat d’impulsion scientifique du F.N.R.S. (“*extension of Koenker and Basset (1978)’s celebrated concept of regression quantiles to the multivariate setting (multiple output regression), and development of the corresponding multivariate rank scores*”).

2010: National Bank of Belgium (“*Principal component analysis for financial data*”).

2010-2015: A.R.C. (Action de Recherche Concertée) of the Communauté Française de Belgique (“*Statistical methods for complex static and dynamic dependence models*”). Project coordinator.

2012-2017: I.A.P. (Interuniversity attraction poles) of the Belgian Science Policy Office. (*“Developing crucial Statistical methods for Understanding major complex Dynamic Systems in natural, biomedical and social sciences (StUDyS)”*). Scientist in charge for the Université libre de Bruxelles.

2016: National Bank of Belgium (*“Données multi-dimensionnelles et séries chronologiques en économie et en finance : estimateurs par test préliminaire, tests de contiguïté et sujets liés”*).

2016-2017: crédit aux chercheurs F.N.R.S. (*“Contiguity-robust inference, tests of contiguity and applications in pre-test estimation”*).

8 Prizes and awards

1997: **Sterpenich Prize**: annual prize for the best undergraduate student in Mathematics.

1998: **Médaille de l’Université Libre de Bruxelles**, promotion 1997-1998.

2003: **Prix Marie-Jeanne Laurent-Duhamel**, which is awarded every second year by the Société Française de Statistique to the best Ph.D. in Statistics defended in a French-speaking university in the previous three years.

2005: **Elected member of the International Statistical Institute**.

2005: **Prix du Concours annuel de la Classe des Sciences de l’Académie Royale de Belgique** for a dissertation entitled “Sur l’Efficacité Asymptotique Uniforme des Procédures de Rangs Signés Multivariées”.

2007: **Gottfried E. Noether Young Scholar Award**, for research accomplishments in nonparametric statistics, American Statistical Association.

2007: **Prix Adolphe Wetrems de la Classe des Sciences de l’Académie Royale de Belgique**. This price, created in 1926, is granted every year to a Belgian scientist rewarding “the most useful discovery or invention in physics, mathematics or the natural sciences,” made during the previous year.

2012: **Gumbel lecture**, Annual meeting of the German Statistical Association (Statistische Woche, Vienna).

2017: **Godeaux lecture**, Annual meeting of the Belgian Mathematical Society, Brussels.

9 Publications

Published or in press:

1. Selecting a sequence of last successes in independent trials (coauthor: F. T. Bruss). *Journal of Applied Probability* **37**, 389–399 (2000).
2. R-estimation for ARMA models (coauthors: J. Allal and A. Kaaouachi). *Journal of Nonparametric Statistics* **13**, 815–831 (2001).
3. Optimal tests for multivariate location based on interdirections and pseudo-Mahalanobis ranks (coauthor: M. Hallin). *Annals of Statistics* **30**, 1103–1133 (2002).
4. Multivariate signed ranks: Randles' interdirections or Tyler's angles? (coauthor: M. Hallin). In Y. Dodge, Ed., *Statistical data analysis based on the L_1 -norm and related methods*, Birkhäuser, Basel, 271–282 (2002).
5. Optimal procedures based on interdirections and pseudo-Mahalanobis ranks for testing multivariate elliptic white noise against ARMA dependence (coauthor: M. Hallin). *Bernoulli* **8**, 787–815 (2002)
6. Affine-invariant linear hypotheses for the multivariate general linear model with ARMA error terms (coauthor: M. Hallin). In M. Moore, S. Froda, and Chr. Léger, Eds, *Mathematical Statistics and Applications: Festschrift for Constance van Eeden*, I.M.S. Lecture Notes-Monograph Series, I.M.S., Hayward, California, 417–434 (2003).
7. Procédures optimales fondées sur les rangs multivariés. *Journal de la Société Française de Statistique* **144**, 25–66 (2003).
8. Rank-based optimal tests of the adequacy of an elliptic VARMA model (coauthor: M. Hallin). *Annals of Statistics* **32**, 2642–2678 (2004).
9. A unified and elementary proof of serial and nonserial, univariate and multivariate, Chernoff-Savage results. *Statistical Methodology* **1**, 81–91 (2004).
10. Multivariate signed rank tests in vector autoregressive order identification (coauthor: M. Hallin). *Statistical Science* **19**, 697–711 (2004).
11. Affine-invariant aligned rank tests for the multivariate general linear model with ARMA errors (coauthor: M. Hallin). *Journal of Multivariate Analysis* **93**, 122–163 (2005).
12. Optimal signed-rank tests based on hyperplanes (coauthor: H. Oja). *Journal of Statistical Planning and Inference* **135**, 300–323 (2005).
13. Asymptotic linearity of serial and nonserial multivariate signed rank statistics (coauthor: M. Hallin). *Journal of Statistical Planning and Inference* **136**, 1–32 (2006).
14. A Chernoff-Savage result for shape. On the non-admissibility of pseudo-Gaussian methods. *Journal of Multivariate Analysis* **97**, 2206–2220 (2006).
15. Semiparametrically efficient rank-based inference for shape. I. Optimal rank-based tests for sphericity (coauthor: M. Hallin). *Annals of Statistics* **34**, 2707–2756 (2006).

16. Semiparametrically efficient rank-based inference for shape. II. Optimal R-estimation of shape (coauthors: M. Hallin and H. Oja). *Annals of Statistics* **34**, 2757–2789 (2006).
17. Parametric and semiparametric inference for shape: the role of the scale functional (coauthor: M. Hallin). *Statistics & Decisions* **24**, 327–350 (2006).
18. Chernoff-Savage and Hodges-Lehmann results for Wilks’ test of multivariate independence (coauthor: M. Hallin). In M. Silvapulle, Ed., *Beyond Parametrics in Interdisciplinary Research: Festschrift in Honor of Professor Pranab K. Sen*, I.M.S. Lecture Notes-Monograph Series, 184–196 (2008).
19. Optimal rank-based tests for homogeneity of scatter (coauthor: M. Hallin). *Annals of Statistics* **36**, 1261–1298 (2008).
20. Optimal detection of Fechner-asymmetry (coauthors: D. Cassart and M. Hallin). *Journal of Statistical Planning and Inference* **138**, 2499–2525 (2008).
21. A general method for constructing pseudo-Gaussian tests (coauthor: M. hallin). *Journal of the Japan Statistical Society* **38**, 27–40 (2008).
22. Pseudo-Gaussian inference in heterokurtic elliptical common principal components models (coauthors: M. Hallin and T. Verdebout). *Annales de l’ISUP*, LII, 9-24 (2008).
23. A canonical definition of shape. *Statistics and Probability Letters* **78**, 2240–2247 (2008).
24. Optimal tests for homogeneity of covariance, scale, and shape (coauthor: M. Hallin). *Journal of Multivariate Analysis* **100**, 422–444 (2009).
25. Signed-rank tests for location in the symmetric independent component model (coauthors: K. Nordhausen and H. Oja). *Journal of Multivariate Analysis* **100**, 821–834 (2009).
26. Discussion of “Invariant Co-ordinate Selection”, by D. E. Tyler, F. Critchley, L. Dümbgen, and H. Oja. *Journal of the Royal Statistical Society, series B* **71**, 577–578 (2009).
27. Le Cam optimal tests for symmetry against Ferreira and Steel’s general skewed distributions (coauthor: Chr. Ley). *Journal of Nonparametric Statistics* **21**, 943–967 (2009).
28. On multivariate runs tests for randomness. *Journal of the American Statistical Association* **104**, 1525-1538 (2009).
29. Multivariate quantiles and multiple-output regression quantiles: From L_1 optimization to halfspace depth (coauthors: M. Hallin and M. Šiman). *Annals of Statistics* **38**, 635-669 (2010).
30. Rejoinder: Multivariate quantiles and multiple-output regression quantiles (coauthors: M. Hallin and M. Šiman). *Annals of Statistics* **38**, 694-703 (2010).
31. On the singularity of multivariate skew-symmetric models (coauthor: Chr. Ley). *Journal of Multivariate Analysis* **101**, 1434-1444 (2010).
32. Optimal rank-based testing for principal components (coauthors: M. Hallin and T. Verdebout). *Annals of Statistics* **38**, 3245-3299 (2010).

33. On the estimation of cross-information quantities in R-estimation. In J. Antoch, M. Hušková and P.K. Sen, Editors: *Nonparametrics and Robustness in Modern Statistical Inference and Time Series Analysis: A Festschrift in Honor of Professor Jana Jurečková*, I.M.S. Monographs-Lecture Notes, 35-45 (coauthors: D. Cassart and M. Hallin).
34. Multivariate skewing mechanisms: a unified perspective based on the transformation approach (coauthor: Chr. Ley). *Statistics and Probability Letters* **80**, 1685-1694 (2010).
35. Testing for common principal components under heterokurticity (coauthors: M. Hallin and T. Verdebout). *Journal of Nonparametric Statistics* **22**, 879-895 (2010).
36. On Fisher information matrices and profile log-likelihood functions in generalized skew-elliptical models (coauthor: Chr. Ley). *METRON International Journal of Statistics* **68**, 235-250 (2010).
37. On directional multiple-output quantile regression (coauthor: M. Šíman). *Journal of Multivariate Analysis* **102**, 193-212 (2011).
38. A class of optimal tests for symmetry based on local Edgeworth approximations (coauthors: D. Cassart and M. Hallin). *Bernoulli* **17**, 1063-1094 (2011).
39. A stochastic analysis of some two-person sports (coauthor: Y. Swan). *Studies in Applied Mathematics* **127**, 221-249 (2011).
40. LAN property for lacunar wavelet series multifractal model (coauthor: J.M. Loubes). *ESAIM: Probability and Statistics* **15**, 69-82 (2011).
41. Semiparametrically efficient inference based on signed ranks in symmetric independent component models (coauthor: P. Ilmonen). *Annals of Statistics* **39**, 2448-2476 (2011). With a peer-reviewed [supplement](#).
42. Computing multiple-output regression quantile regions (coauthor: M. Šíman). *Computational Statistics and Data Analysis* **56**, 840-853 (2012).
43. Computing multiple-output regression quantile regions from projectional quantiles (coauthor: M. Šíman). *Computational Statistics* **27**, 29-49 (2012).
44. Runs tests (coauthor: Chr. Ley). In *Encyclopedia of Environmetrics*, 2nd edition, A. H. El-Shaarawi and W. Piegorsch (eds). John Wiley & Sons Ltd, Chichester, UK, 2474-2481 (2012).
45. Elliptical symmetry. In *Encyclopedia of Environmetrics*, 2nd edition, A. H. El-Shaarawi and W. Piegorsch (eds). John Wiley & Sons Ltd, Chichester, UK, 802-807 (2012).
46. Rank tests for elliptical graphical modeling (coauthor: Th. Verdebout). *Journal de la Société Française de Statistique* **153**, 82-100 (2012).
47. Pseudo-Gaussian and rank-based optimal tests for random individual effects in large n small T panels (coauthors: N. Bennala and M. Hallin). *Journal of Econometrics* **170**, 50-67 (2012).
48. From depth to local depth : a focus on centrality (coauthor: G. Van Bever). With a [supplement](#). *Journal of the American Statistical Association* **105**, 1105-1119 (2013).

49. Optimal rank-based tests for common principal components (coauthors: M. Hallin and Th. Verdebout). *Bernoulli* **19**, 2524–2556 (2013).
50. Inference on the shape of elliptical distributions based on the MCD (coauthor: G. Van Bever). *Journal of Multivariate Analysis* **129**, 125–144 (2014).
51. Efficient R-estimation of principal and common principal components (coauthors: M. Hallin and Th. Verdebout). *Journal of the American Statistical Association* **109**, 1071–1083 (2014).
52. Conditional quantile estimation through optimal quantization (coauthors: I. Charlier and J. Saracco). *Journal of Statistical Planning and Inference* **156**, 14–30 (2015).
53. Optimal rank-based tests for the location parameter of a rotationally symmetric distribution on the hypersphere (coauthor: Th. Verdebout). In M. Hallin, D. Mason, D. Pfeifer, and J. Steinebach Eds, *Mathematical Statistics and Limit Theorems: Festschrift in Honor of Paul Deheuvels*. Springer, pp. 249–270 (2015).
54. Nonparametrically consistent depth-based classifiers (coauthor: G. Van Bever). *Bernoulli* **21**, 62–82 (2015).
55. High-dimensional tests for spherical location and spiked covariance (coauthors: Chr. Ley and Th. Verdebout). *Journal of Multivariate Analysis* **139**, 79–91 (2015).
56. Local constant and local bilinear multiple-output quantile regression (coauthors: M. Hallin, Z. Lu, and M. Šiman). *Bernoulli* **21**, 1435–1466 (2015).
57. Conditional quantile estimation based on optimal quantization: from theory to practice (coauthors: I. Charlier and J. Saracco). *Computational Statistics and Data Analysis* **91**, 20–39 (2015).
58. Discussion of “Multivariate Functional Outlier Detection”, by Mia Hubert, Peter Rousseeuw and Pieter Segaeert (coauthor: G. Van Bever). *Statistical Methods and Applications* **24**, 223–231 (2015).
59. Discussion of “On families of distributions with shape parameters”, by M.C. Jones (coauthor: Chr. Ley). *International Statistical Review* **83**, 202–207 (2015).
60. Optimal rank tests for symmetry against Edgeworth-type alternatives (coauthors: D. Cassart and M. Hallin). In K. Nordhausen and S. Taskinen Eds, *Modern Nonparametric, Robust and Multivariate Methods, Festschrift in Honor of Hannu Oja*, Springer, 109–132 (2015).
61. Depth-based runs tests for bivariate central symmetry (coauthors: R. Dyckerhoff and Chr. Ley). *Annals of the Institute of Statistical Mathematics* **67**, 917–941 (2015).
62. QuantifQuantile: an R package for performing quantile regression through optimal quantization (coauthors: I. Charlier and J. Saracco). *The R Journal* **7**, 65–80 (2015).
63. On high-dimensional sign tests (coauthor: Th. Verdebout). *Bernoulli* **22**, 1745–1769 (2016).
64. Affine-invariant rank tests for multivariate independence in independent component models (coauthor: H. Oja and S. Taskinen). *Electronic Journal of Statistics* **10**, 2372–2419 (2016).
65. Probit transformation for nonparametric kernel estimation of the copula density (coauthors: G. Geenens and A. Charpentier). *Bernoulli* **23**, 1848–1873 (2017).

66. Tests of concentration for low-dimensional and high-dimensional directional data (coauthors: Chr. Cutting and Th. Verdebout). In S. Ejaz Ahmed Ed., *Big and Complex Data Analysis: Methodology and Applications*, Springer, Cham Heidelberg New York, 209–227.
67. Preliminary test estimation for multi-sample principal components (coauthors: J. Rasoafarainaina and Th. Verdebout). *Econometrics & Statistics* **2**, 106–116 (2017).
68. Inference on the mode of weak directional signals : a Le Cam perspective on hypothesis testing near singularities (coauthor: Th. Verdebout). *Annals of Statistics* **45**, 800–832 (2017).
69. Testing uniformity on high-dimensional spheres against monotone rotationally symmetric alternatives (coauthors: Chr. Cutting and Th. Verdebout). *Annals of Statistics* **45**, 1024–1058 (2017).
70. On the maximal halfspace depth of permutation-invariant distributions on the simplex. *Statistics and Probability Letters*, to appear (coauthor: G. Van Bever).

Submitted:

71. Multiple-output quantile regression through optimal quantization (coauthors: I. Charlier and J. Saracco).
72. Halfspace depths for scatter, concentration and shape matrices (coauthor: G. Van Bever).
73. Tyler shape depth (coauthor: G. Van Bever).
74. On optimal tests for rotational symmetry against new classes of hyperspherical distributions (coauthors: E. García-Portugués and Th. Verdebout).

10 Talks in international meetings and conferences

1. XXXIIèmes Journées de Statistique, annual meeting of the French Statistical Society, Fès, Morocco, May 2000: *Sélection d'une suite de derniers succès dans une suite d'expériences aléatoires indépendantes.*
2. XXXIIIèmes Journées de Statistique, annual meeting of the French Statistical Society, Nantes, France, May 2001: *Tests optimaux pour le problème de position multivarié fondés sur les interdirections de Randles et les pseudo-rangs de Mahalanobis.*
3. XXXIVèmes Journées de Statistique, annual meeting of the French Statistical Society, Bruxelles, Belgium, May 2002: *Tests de bruit blanc multivarié optimaux fondés sur les interdirections de Randles et les rangs de Mahalanobis.*
4. International conference on current advances and trends in nonparametric statistics, Crete, Greece, July 2002: *Tests of randomness against VARMA dependence based on interdirections and Mahalanobis ranks.*

5. Fourth international conference on statistical data analysis based on the L_1 -norm and related methods, Neuchâtel, Switzerland, August 2002: *Optimal tests of randomness based on interdirections and pseudo-Mahalanobis ranks for testing multivariate elliptic white noise against ARMA dependence.*
6. Fourth international conference on statistical data analysis based on the L_1 -norm and related methods, Neuchâtel, Switzerland, August 2002: *Optimal one-sample testing procedures based on hyperplanes* (invited speaker).
7. Second Prague-Brussels seminar, Prague, Czech Republic, August 2002: *Affine-invariant linear hypotheses for the multivariate general linear model with ARMA error terms.*
8. XXXVèmes Journées de Statistique, annual meeting of the French Statistical Society, Lyon, France, June 2003: *Procédures optimales fondées sur les rangs multivariés* (invited plenary talk, for the Marie-Jeanne Laurent-Duhamel prize).
9. Meeting on mathematical statistics, C.I.R.M. (Centre International de Rencontres Mathématiques), Marseille-Luminy, France, December 2003: *Optimal rank-based tests for sphericity.*
10. Workshop on multivariate time series analysis, Heidelberg, Germany, February 2004: *Multivariate signed rank tests in vector autoregressive order identification.*
11. XXXVIèmes Journées de Statistique, annual meeting of the French Statistical Society, Montpellier, France, May 2004: *Tests de sphéricité optimaux fondés sur les rangs.*
12. Sixth ICSA (International Chinese Statistical Association) international conference, Singapore, July 2004: *Optimal rank-based tests for sphericity* (invited talk).
13. Journées MAS de la SMAI, Nancy, France, September 2004: *Inférence semi-paramétrique sur la forme des lois elliptiques* (invited talk).
14. Joint meeting of the Belgian, Dutch, Luxemburg, and French mathematical societies, Ghent, Belgium, May 2005: *A class of affine-equivariant rank-based estimators for the shape of an elliptical distribution* (invited talk).
15. Workshop on nonparametric statistical methods, University of Tampere, Finland, June 2005: *Rank-based inference on the shape of elliptical distributions* (invited talk).
16. Journées de la Statistique Rennaise, Université de Rennes, France, November 2005: *Rank-based estimation of shape* (invited talk).
17. International Conference on Robust Statistics (ICORS), Lisbon, Portugal, July 2006: *efficiency- and validity-robust tests for homogeneity of scatter matrices.*
18. Conference on nonparametric statistics and related topics, Ottawa, Canada, September 2006: *Optimal rank-based tests for homogeneity of scatter* (invited talk).
19. Workshop on robust and nonparametric statistical inference, Hejnice, Czech Republic, September 2007: *A new approach to R-estimation* (invited talk).

20. Nonparametric statistics and mixture models: past, present, and future, Penn State University, USA, May 2008: *Rank-based tests of multivariate independence in independent component models* (invited talk).
21. Joint Meeting of the Statistical Society of Canada and the Société Française de Statistique, Ottawa, Canada, May 2008: *Invariant methods for independent component models* (invited plenary talk).
22. Twenty-second Nordic Conference on Mathematical Statistics, Vilnius, Lithuania, June 2008: *Invariant semiparametric methods for independent components models* (invited talk).
23. Second Brussels-Waseda Seminar on Time Series and Financial Statistics, Brussels, Belgium, June 2008: *A new approach to R-estimation*.
24. Joint Statistical Meetings, Denver, Colorado, USA, August 2008: *A new approach to R-estimation* (invited talk, for the *Gottfried E. Noether Young Scholar Award*).
25. Workshop on “Nonparametric Statistics, Refined, Redefined, and Renewed”, the University of Texas at Arlington, USA, April 2009: *On multivariate runs tests for randomness* (invited talk).
26. International Conference on Robust Statistics (ICORS), Parma, Italy, June 2009: *On multivariate runs tests for randomness*.
27. Fourth Brussels-Waseda Seminar on Time Series and Financial Statistics, Brussels, Belgium, June 2009: *Multivariate quantiles, from L_1 optimization to halfspace depth*.
28. European Meeting of Statisticians, Toulouse, France, July 2009: *On multivariate runs tests for randomness*.
29. Conference on Nonparametric Statistics and Statistical Learning, The Ohio State University, USA, May 2010: (invited talk).
30. Conference on time series, quantile regression and model choice, University of Dortmund, Germany, September 2010: *Local bilinear multiple-output quantile regression* (invited talk).
31. 4th CSDA International Conference on Computational and Financial Econometrics (CFE'10), University of London, UK, December 2010: *Rank-based inference in independent component models* (invited talk).
32. Waseda symposium on Theory and Applications for Time Series Analysis, Waseda university, Japan, March 2011: *Rank tests for PCA* (invited talk).
33. Atami seminar, Atami, Japan, March 2011: *Depth-based runs tests for multivariate central symmetry* (invited talk).
34. Wonder Research Afternoon, Tilburg, The Netherlands, April 2011: *Multivariate runs tests* (invited talk).
35. IMA's 3rd Conference on Mathematics in Sport, Manchester, United Kingdom, June 2011: *A stochastic analysis of some two-person sports*.

36. 19th Annual Meeting of the Belgian Statistical Society, Hasselt, Belgium, October 2011: *Rank-based ICA*.
37. 4th International Conference of the ERCIM Working Group on Computing & Statistics (ERCIM'11), University of London, UK, December 2011: *Semiparametrically efficient inference based on signed ranks in symmetric independent component models* (invited talk).
38. Workshop on robust methods for dependent data, Dortmund, Germany, February 2012: *Universally consistent depth-based classifiers* (invited talk).
39. First Joint Conference of the Belgian, Royal Spanish and Luxembourg Mathematical Societies, Liège, Belgium, June 2012: *Statistical depth and classification* (invited talk).
40. First Conference of the International Society for Nonparametric Statistics, Chalkidiki, Greece, June 2012: *R-estimation in independent component analysis* (invited talk).
41. 8th World Congress in Probability and Statistics, Istanbul, Turkey, July 2012: *Universally consistent depth-based classifiers* (invited talk).
42. International Conference on Robust Statistics (ICORS), Burlington, Vermont, USA, August 2012: *Testing linear constraints in IC models* (invited talk).
43. Statistische woche 2012, Vienna, Austria, September 2012: *Nonparametrically consistent depth-based classifiers* (Gumbel invited lecture).
44. 5th International Conference of the ERCIM Working Group on Computing & Statistics (ERCIM'12), Oviedo, Spain, December 2012: *Local Multiple-Output Quantile Regression* (invited talk).
45. 2ème Rencontre de Statistique Avignon-Marseille, June 2013: *Quantiles multivariés et profondeur conditionnelle* (invited talk).
46. 2013 edition of the Brussels Summer School of Mathematics (BSSM), August 2013: *Profondeur statistique et quantile* (invited talk).
47. 59th World Statistics Congress, Hong Kong, China, August 2013: *From Depth to Local Depth : A Focus on Centrality* (invited talk).
48. 6th International Conference of the ERCIM Working Group on Computational and Methodological Statistics (ERCIM'13), University of London, UK, December 2013: *Local Depth for Functional Data* (invited talk).
49. Meeting entitled "Advances in Directional Statistics", Université libre de Bruxelles, Belgium, May 2014: *Universal asymptotics for high-dimensional sign tests* (invited talk).
50. Second Conference of the International Society for Nonparametric Statistics, Cadiz, Spain, June 2014: *Universal asymptotics for high-dimensional sign tests* (invited talk).
51. Second Conference of the International Society for Nonparametric Statistics, Cadiz, Spain, June 2014: *Multiple-output Functional Quantile Regression* (invited talk).

52. 47èmes Journées de Statistique, annual meeting of the French Statistical Society, Lille, France, June 2015: *Tests d'uniformité sur la sphère unité de grande dimension*.
53. The Joint Statistical Meetings, Seattle, USA, August 2015: *Multiple-output Functional Quantile Regression* (invited talk).
54. 8th International Conference of the ERCIM WG on Computational and Methodological Statistics (CMStatistics 2015), London, UK, December 2015: *Testing for spherical location in the vicinity of the uniform distribution* (invited talk).
55. Third Conference of the International Society for Nonparametric Statistics, Avignon, France, June 2016: *Testing uniformity on high-dimensional spheres against symmetric and asymmetric spiked alternatives* (invited talk).
56. Seventh Workshop on "New developments in econometrics and time series", October 2016: *Testing uniformity on high-dimensional spheres* (invited talk).
57. 24th Annual Meeting of the Belgian Statistical Society, Namur, Belgium, October 2016: *Inference on the mode of weak directional signals: A Le Cam perspective on hypothesis testing near singularities*.
58. 10th International Chinese Statistical Association, Shanghai, China, December 2016: *Testing uniformity on high-dimensional spheres against symmetric and asymmetric spiked alternatives* (invited talk).
59. 9th International Conference of the ERCIM WG on Computational and Methodological Statistics (CMStatistics 2016), Seville, Spain, December 2016: *Efficiency in the high-dimensional one-sample location problem* (invited talk).
60. 10th ICSA International Conference, Shanghai, China, December 2016: *Testing uniformity on high-dimensional spheres against symmetric and asymmetric spiked alternatives* (invited talk).
61. Nationale Wiskunde Dagen, Noordwijkerhout, The Netherlands, February 2017: *Statistics and cinema: the good, the bad and the ugly* (invited talk).
62. Godeaux lecture, Joint VVWL-BMS-SBPMef conference of mathematics, Brussels, Belgium, May 2017: *Hypothesis testing in non-standard situations* (invited talk).
63. 61st World Statistics Congress, Marrakech, Morocco, July 2017: *Efficiency in the high-dimensional one-sample location problem* (invited talk).

11 Other invited talks

1. Statistics seminar, KULeuven, Belgium, February 2002: *Optimal tests for multivariate location based on interdirections and pseudo-Mahalanobis ranks*.

2. Statistics seminar, Université de Lille I, France, December 2002: *Tests optimaux de bruit blanc multivarié fondés sur des rangs signés généralisés.*
3. Workshop on multivariate nonparametric statistics, Himos, Finland, January 2003: *Affine Invariant Linear Hypotheses for the Multivariate GLM with VARMA Error Terms.*
4. Statistics seminar, University of Jyväskylä, Finland, January 2003: *Hyperplane-based identification procedures for the order of a multivariate AR series.*
5. Statistics seminar, Université de Paris VI, February 2003: *Tests de bruit blanc multivarié optimaux fondés sur les interdirections de Randles et les rangs de Mahalanobis.*
6. Statistics seminar, Tilburg university, The Netherlands, March 2003: *Hyperplane-based procedures for testing elliptical randomness against VARMA dependence.*
7. GREMARS seminar, Université de Lille III, France, October 2003: *Optimal procedures based on interdirections and pseudo-Mahalanobis ranks for testing multivariate elliptic white noise against ARMA dependence.*
8. Statistics and Econometrics seminar, University of York, United Kingdom, October 2003: *Multivariate rank-based procedures for testing elliptical randomness against VARMA dependence.*
9. Statistics seminar, Université Catholique de Louvain, Belgium, December 2003: *Multivariate rank-based procedures for testing elliptical randomness against VARMA dependence.*
10. Statistics seminar, University of Orsay, Paris, France, January 2004: *Multivariate rank-based procedures for testing elliptical randomness against VARMA dependence.*
11. Statistics seminar, Université de Liège, Belgium, January 2004: *Optimal rank-based tests for sphericity.*
12. Statistics seminar, Institut für Mathematische Stochastik, Technical University of Braunschweig, Germany, May 2004: *Multivariate rank-based procedures for testing elliptical randomness against VARMA dependence.*
13. Statistics seminar, University of Dortmund, Germany, June 2004: *Optimal rank-based tests for sphericity.*
14. Stochastics colloquium, Institute for Mathematical Stochastics, University of Goettingen, Germany, October 2004: *Optimal rank-based tests for sphericity.*
15. Statistics seminar, Waseda University, Tokyo, Japan, January 2005: *Inference on the shape of elliptical distributions.*
16. Series of lectures on research in mathematics for first year Bachelor students in Mathematics, Vrije Universiteit Brussel, Belgium, March 2005: *Seeking the Holy Grail: ultimate estimators of multivariate location.*
17. Econometrics and Statistics seminar, Tilburg University, The Netherlands, April 2005: *On the shape of elliptical distributions. Rank-based estimators and tests.*

18. Statistics seminar, Universidad Carlos III de Madrid, Spain, May 2005: *Inference on the shape of elliptical distributions.*
19. Statistics seminar, University of Tampere, Finland, February 2006: *Rank-based tests for the equality of covariance matrices.*
20. Swiss Statistics Seminars, Institut für Exakte Wissenschaften, University of Bern, Switzerland, May 2006: *Rank-based tests of multivariate independence in independent component models.*
21. Statistics seminar, University of Dortmund, Germany, December 2006: *A class of affine-equivariant rank-based estimators for the shape of an elliptical distribution.*
22. Workshop on multivariate nonparametric statistics, Himos, Finland, janvier 2007: *Multivariate medians: A quick review and a new proposal.*
23. Statistics seminar, KULeuven, Belgium, February 2007: *Testing for multivariate independence in independent component models.*
24. Presentation for the Association of Belgian Science Journalists, Brussels, Belgium, janvier 2008: *Mathématique: Modèles et décision.*
25. ECORE seminar, Université catholique de Louvain, Belgium, February 2008: *Independent component models: new extensions of the multivariate normal model.*
26. Statistics seminar, School of Public Health, Université Libre de Bruxelles, Belgium, April 2008: *Independent component (IC) models: new extensions of the multinormal model.*
27. Statistics seminar, Columbia University, New York, USA, November 2008: *Optimal rank-based tests for homogeneity of scatter.*
28. Statistics seminar, the University of Texas at Dallas, USA, April 2009: *Rank-based tests of multivariate independence in independent component models.*
29. Statistics seminar, University of Tampere, Finland, May 2009: *On multivariate runs tests for randomness.*
30. Statistics Seminar, Università di Padova, Italy, September 2009: *Singularities in skew-symmetric models: characterization results and asymptotic implications.*
31. Statistics Seminar, University of Bayreuth, Germany, January 2010: *Multivariate quantiles and multiple-output regression quantiles: From L_1 optimization to halfspace depth.*
32. Statistics Seminar, The Open University, Milton Keynes, United Kingdom, February 2010: *Multivariate quantiles and multiple-output regression quantiles: From L_1 optimization to halfspace depth.*
33. Econometrics and Statistics Seminar, EQUIPPE, Université de Lille III, France, March 2011: *Rank tests for PCA.*

34. Statistics Seminar, GREMAQ/TSE, Université des Sciences Sociales de Toulouse, France, May 2011: *Multivariate quantiles and multiple-output regression quantiles : from L_1 optimization to halfspace depth.*
35. Seminar for Statistics, ETH Zurich, Switzerland, November 2011: *Rank-based inference for independent component analysis.*
36. Seminar for Statistics, University of Vienna, Austria, January 2013: *Local multiple-output quantile regression.*
37. Seminar for Statistics, University of Cologne, Germany, February 2013: *Local depth through depth-based neighborhoods.*
38. Seminar for Statistics, “point de vue” series, Université Paris-Diderot Paris 7, February 2013: *Quantiles multivariés et profondeur conditionnelle.*
39. Seminar for Statistics, University of Cambridge, UK, May 2013: *From depth to local depth : a focus on centrality.*
40. ULB-UCL Statistics seminar, Université catholique de Louvain, Belgium, November 2013: *From depth to local depth : a focus on centrality.*
41. Seminar for Statistics, Heinrich Heine Universität Düsseldorf, Germany, January 2014: *Rank-based inference for one-sample and multi-sample principal component analysis.*
42. Seminar for Statistics, TU Dortmund, Germany, January 2014: *Rank-based inference for one-sample and multi-sample principal component analysis.*
43. Institut des Hautes Etudes de Belgique, Brussels, Belgium, March 2015: *La statistique fait son cinéma : illustration de quelques méthodes statistiques sur des données cinématographiques.*
44. Mathematics colloquium, KULeuven, Belgium, March 2015: *Testing uniformity on high-dimensional spheres.*
45. Seminar for Statistics, Aalto university, Finland, April 2015: *Testing uniformity against contiguous rotationally symmetric alternatives on high-dimensional spheres.*
46. Seminar for Econometrics and Statistics, Toulouse School of Economics, Université Toulouse 1 Capitole, France, April 2015: *Testing uniformity against contiguous rotationally symmetric alternatives on high-dimensional spheres.*
47. Congrès annuel de la Société Belge des Professeurs de Mathématique d’expression française (SBPMef), Mons, Belgium, August 2015: *La statistique fait son cinéma : illustration de quelques méthodes statistiques sur des données cinématographiques.*
48. A path through probability, conference in honour of F. Thomas Bruss, Brussels, Belgium, September 2015: *Testing uniformity on high-dimensional spheres.*
49. Statistics seminar, Bocconi University, Milan, Italy, November 2015: *Testing uniformity on high-dimensional spheres against rotationally symmetric alternatives.*

50. Statistics seminar, University of Orsay, Paris, France, November 2015: *Testing uniformity on high-dimensional spheres against rotationally symmetric alternatives.*
51. Mathematics colloquium, Aalto University, Helsinki, Finland, January 2016: *Inference on the mode of weak directional signals: a Le Cam perspective on hypothesis testing near singularities.*
52. Journée organisée par la Régionale de l'APMEP (Association des Professeurs de Mathématiques de l'Enseignement Public) de Lorraine, Nancy, France, March 2016: *La statistique fait son cinéma : illustration de quelques méthodes statistiques sur des données cinématographiques.*
53. Statistics and probability seminar of the Institut Elie Cartan, Nancy, France, March 2016: *Testing uniformity on high-dimensional spheres against monotone rotationally symmetric alternatives.*
54. Seminar for Econometrics and Statistics, Toulouse School of Economics, Université Toulouse 1 Capitole, France, April 2016: *Inference on the mode of weak directional signals: a Le Cam perspective on hypothesis testing near singularities.*
55. Short course, Programme doctoral en statistique et probabilités appliquées, Villars-sur-Ollon, Switzerland, September 2016: *From statistical depth to multivariate quantiles.*
56. Séminaire de statistique, Université de Lille 1 - INRIA Modal, Lille, France, November 2016: *Testing uniformity on high-dimensional spheres against monotone rotationally symmetric alternatives.*
57. Statistics workshop at Tilburg University, The Netherlands, December 2016: *Testing uniformity on high-dimensional spheres against monotone rotationally symmetric alternatives.*
58. Statistics workshop at London School of Economics, London, UK, February 2017: *Testing uniformity on high-dimensional spheres against monotone rotationally symmetric alternatives.*
59. Adolphe Quetelet Seminar, Universiteit Gent, Ghent, Belgium, March 2017: *Inference on the mode of weak directional signals: a Le Cam perspective on hypothesis testing near singularities.*
60. Ecole Polytechnique, Paris, April 2017: *Testing uniformity on high-dimensional spheres.*
61. Lille Research Workshop on Statistics and Econometrics, Université Lille 3, Lille, France, May 2017: *Inference on the mode of weak directional signals: a Le Cam perspective on hypothesis testing near singularities.*
62. Workshop celebrating Peter Rousseeuw's 60th birthday, KULeuven, Leuven, Belgium, June 2017: *Halfspace depths for scatter, concentration and shape matrices .*
63. ADISTA17 (Workshop on Advances in Directional Statistics), Rome, Italy, June 2017: *On the asymptotic non-null behavior of high-dimensional spherical location tests.*
